

# ADVANCED Safety covers *for your pool*

## SAFETY IS EVERYONE'S RESPONSIBILITY.

As much as we try to build in every possible safety measure, it is the consumer's responsibility to follow all safety instructions provided with the Advanced Safety Cover, and to educate all users of the pool product as to its safe handling and proper use. *Covers depicted are representative of the actual material; however, variations in color and shading may occur.*

## Protection for your *family* and your *investment.*

# Safety Conscious?

**Advanced Safety Covers** are not only effective protection for your pool, but more importantly for your family. These covers are manufactured specifically to fit your pool size and shape. When properly installed, the Advanced Safety Cover will prevent accidental intrusion by children and pets.

- **Solid Safety Cover with *INVIS-A-DRAIN™***

Every 6" there are 1/4" drain holes inserted in reinforced vinyl, down the center of the pool cover. Underneath is a 12" wide mesh drain filter panel designed for simple cleaning.

- **Solid Cover with Optional Pump**

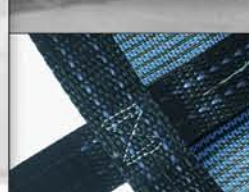

Use of a weighted cover pump will rapidly pump off all standing water, such as rain or melting snow and will maintain all applicable safety standards.

- **Strong as its Seams**

Advanced Safety Covers are equipped with interlocking seams, double overlapped for ultimate strength and coverage.

- **Excellence and Durability**

Durable box tack reinforcements are found on all safety straps. Protective pads are located at step nosing to prevent abrasion. Added protection is found on every component including the thread—to resist ultra-violet rays, and pool chemicals. 12-year warranty included.

## Advanced Universal Step System

The revolutionary design of the USS safety cover step allows you to position a prefabricated step section anywhere on a standard non-step safety cover for any free form shaped pool.

All prefabricated step sections are made with solid safety cover material to help protect the step from slit and staining while covered. The solid green material is standard on all green solid and mesh covers and the solid blue material is standard on all blue solid and mesh covers.

When used with any Advanced Safety Cover, the Universal Step System meets all ASTM safety standards and is covered by the same warranty as the Advanced Safety Cover. *Patent Pending\**

## Reduced Deck Mount™ System

- *Patent Pending Design.*

- Easy Installation around raised walls, water features, spas and more.
- Designed to maintain a tight fit, perfect for narrow pool decks.
- All Stainless Steel hardware with brass anchors.

## • Pool Cover rubbing you the wrong way?

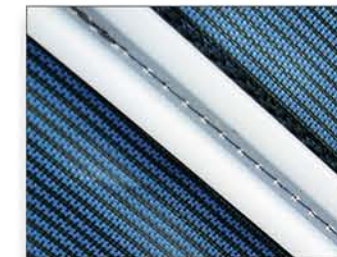

Coping anti-rub strips protect your cover without making unsightly marks or scars on your pool. Keep your pool and cover looking new for years to come.

## • Custom fit heavy duty hardware

Ultra durable stainless steel, double coiled springs with adjacent D-rings for easy installation and adjustment, fabricated to have a lower profile than other covers. This design keeps your cover lying flat and tight, regardless of the pool's shape.

## • Double Decker Edging

Potential trouble spots for pool covers are their perimeters—where they're known to unravel and fray. Covers are first hemmed, and then sandwiched between double layers of webbing. Edges can't unravel, giving you years of trouble free performance.
